## SKILLS

### Backend 🛠️

Python Django

Java AEM, Groovy

### Frontend </>

React

Vue

TypeScript/JavaScript ES6

TailwindCSS

HTML5/CSS3 BEM, utility classes

### Fullstack 🛠️

Next.js

Nuxt.js

### Databases 🗄️

SQL PostgreSQL, SQLite

NoSQL GraphQL, Neo4j

### Agents/AI Tools 🤖

Claude Code

OpenCode

Cursor

### DevOps/tools/methodologies 🛠️

Git

Github Actions

Docker

Kubernetes

Postman

Agile methodologies Scrum, Kanban

### Languages 🗣️

English professional

Spanish native

Catalan native

German work in progress...

## WORK EXPERIENCE

📅 10/2024 - present (1 year)

📍 Daedalus  
Karlsruhe

### Software Engineer

React/Django

- Designed and implemented main parts of a factory management system including technical solutions, process definitions and UI/UX.
- Build a RESTful API with Django for complex and real-time systems.
- Implemented and maintained core micro-services with Kubernetes to ensure robust and scalable system performance across the factory environment.
- Developed 3D simulation tools using Three.js and fiber to model machines, visualize CNC program operations and track robot interactions.
- In charge of Claude Code and GitHub Copilot skills, instructions, and setup for the entire team and project, ensuring best results when using agentic coding.

React TypeScript Three.js/fiber Material UI Django REST PostgreSQL  
Kubernetes Git Kanban Claude Gemini

📅 01/2023 - 06/2025 (2+ years)

📍 VamosRural  
Barcelona - remote

### Fullstack Software Developer

Next.js/Django

- Developed and designed from scratch the PoC for VamosRural's web platform.
- Implemented and deployed the MVP and first versions of the product.
- Developed AI/ML tools to provide support to the platform providers and customers.

Next.js TypeScript Django REST PostgreSQL Docker MinIO Git  
Kanban

📅 09/2019 - 07/2023 (4 years)

📍 Cognizant Netcentric  
Barcelona - remote

### Backend Software Engineer

Java/AEM

- Worked in the implementation of AEM solutions for important customers such as UBS and Lufthansa.
- Developed software for financial data visualization and analysis.
- Worked on the integration of AEM and React with Akamai to improve the SEO of web applications.

Java JUnit5 AEM VanillaJS HTL Jenkins Git Scrum

📅 06/2018 - 08/2019 (1 year)

📍 Inlab FIB (UPC)  
Barcelona

### Researcher/Developer

Bachelor Thesis Program

- Bachelor thesis program to develop models from indicators in the context of learning analytics.
- Implemented an ontology for Learning Management Systems into Neo4j (graph database).
- Extracted, pre-processed, and analyzed data from LMS (Moodle) for data visualization, and calculation of motivational indicators and prediction models.

Scrum LaTeX

📅 05/2016 - 05/2018 (2 years)  
📍 Inlab FIB (UPC)  
Barcelona

## Web Developer

### Internship

- Internship at the research and innovation laboratory of the Barcelona School of Informatics at the Polytechnic University of Catalonia.
- Developed WordPress plugins with PHP for the UOC (Open University of Catalonia).
- Worked in the implementation and improvement of several web applications.

PHP JavaScript Angular Python Docker Git Scrum

## 🎓 EDUCATION

📅 07/2013 - 08/2019  
📍 Polytechnic University  
of Catalonia (UPC)  
Barcelona

## Bachelor in Software Engineering

### Specialization in Computer Science

## 🦾 EXTRACURRICULAR ENGAGEMENT

### Music/bass player

I have been part of two bands as the bass player and always worked to keep improving on myself and learn new things.

#### ***Empty Streets (2019 - 2023)***

Indie/Dream Pop/Shoegaze band. Performed on stage in bars, small scenarios, and a festival. Recorded two singles and an EP ([Northern Lights](#)).

#### ***VOID (2011 - 2019)***

Indie/alternative rock band. Performed on stage several times every year on small scenarios and festivals.

### Electronics for music

Build several guitar and bass pedals and other music devices, either from available schematics or from scratch with my designs.

## EXTRA

[Programming/non-professional](#) 🛠️

**Lua** Neovim, Love2D

**JUCE** audio plugins framework for C++

**Godot** game engine - GDScript/C#

[Hobbies](#) 🎵

**Playing music** bass, guitar, fife

**Electronics/Soldering** bass and guitar pedals
